FOR IMMEDIATE RELEASE

LINC FACILITY SERVICES OPENS OFFICE IN WASHINGTON, D.C. AREA

New Facility to Focus on Growing Government and Technology Client Base

Houston, TX — April 25, 2006 — Linc Facility Services, LLC (LFS) today announced the establishment of a new executive office in Alexandria, Virginia. The expansion will help the 27-year-old facilities management giant better meet the service needs of its growing Mid-Atlantic client base and burgeoning international business, as well as support the company's strategic investment in the federal government and mission-critical technology sectors.

The new office will house LFS President and CEO Phil Rogers, as well as other corporate and client services. The office will also allow the LFS service team to be more responsive to local clients and is ideally positioned to provide customized,

comprehensive on-site facility operations and management services and solutions to new clients as well.

“Not only is D.C. the federal government corridor and an international hub, it has also become one of the largest centers for technology-based companies with mission-critical operations. These are all key new markets for LFS and establishing an office here is a logical and strategic step for us to expand our national and international presence,” said Phil Rogers, president and CEO of LFS. “We’re also pleased that the expansion will give us more face time with the Mid-Atlantic customers we’ve been servicing for more than 15 years and that it will also give them better access to the broad range of capabilities LFS provides.”

LFS is a division of The Linc Group, LLC (TLG), one of the nation’s most innovative providers of comprehensive facility operations and management services. TLG operates out of four corporate hubs — one each in the Northeast, Southeast, Midwest, and West. The company’s unique business methodology and technology infrastructure facilitates this model by allowing executives to remain constantly connected through the Web, collaborative communication tools, and best practice standards.

“The geographic dispersion of our executive talent is intentional and enables the company to respond rapidly to any client situation because a top-level executive can be there within a two-hour window. This gives TLG a significant advantage over our centralized, command-and-control competitors,” said Tracy Price, president and CEO of TLG. “Having Phil and his team in a new Mid-Atlantic hub that is focused on the federal sector complements this strategy and will help us meet our key objectives of establishing and maintaining long-term relationships with our customers that create solid, recurring revenue streams for the company.”

About Linc Facility Services

Headquartered in Houston, Texas, LFS is a business-to-business productivity partner and a leader in technology and high-value facility services. LFS has been providing on-site facility management services to large clients such as Delta JFK – International Airport Terminals 2 and 3, the Philadelphia Museum of Art, the University of Maryland Biotechnology Institute, GlaxoSmithKline, and many more, since 1979. Primary industries served include aviation, government, healthcare, high technology, light manufacturing, real estate, multiple building campuses, and corporate headquarters buildings. LFS partners with clients at more than 150 sites across the United States and overseas and delivers differentiated and innovative facility management solutions that provide quality, efficiency, and a reliable means to superior results.
