FOR IMMEDIATE RELEASE

LINC FACILITY SERVICES FAMILY OF COMPANIES ACQUIRES TECHNOLOGY IN MEDICINE, INC.

*Purchase of Leading Medical Equipment Maintenance Services Company Strengthens LFS'
Healthcare Market Strategy*

Houston, TX — January 5, 2007 — Linc Facility Services[®], LLC (LFS) and its family of companies today announced it has acquired Technology in Medicine, Inc. (TiM), a leading regional provider of medical equipment maintenance management services. TiM's strong presence in the Northeast and more than 30 years of experience serving the healthcare sector complement LFS' comprehensive facility management portfolio, enhance its healthcare services offerings, and extend its customer reach. LFS is a business unit of The Linc Group[®], LLC.

Massachusetts-based TiM has offered a range of high quality, bundled medical equipment services since its founding in 1974. Today, the company provides contracted clinical engineering and technology management services to hospitals, health care systems, and alternative care facilities in the New England and Mid Atlantic regions. In 2001, TiM recognized that the convergence of medical equipment and information systems technology would transform medical equipment from discrete

devices to interconnected clinical systems. As a result, TiM extended its service scope to encompass clinical technology throughout the enterprise. This innovative, enterprise-wide approach has made TiM a leader in its field of healthcare asset and technology management.

“As one of the largest independent medical equipment services firms, the TiM acquisition will provide us with critical mass and instant credibility in the high-tech healthcare market,” said Phil Rogers, LFS president and CEO. “The Northeast houses one of the largest hospital populations in the country. TiM has set the standard for service excellence and value throughout the region, with service to more than 100 healthcare facilities in the Northeast. The company has a long and solid reputation of integrity and excellent quality and we are proud to have them as part of our organization.”

TiM will retain its name but be branded as “A Linc Facility Services Company” and will become an integral part of the LFS commercial division. TiM Founder and President Raymond Peter Zambuto will join the LFS executive team as well as continue to serve as president of TiM.

“LFS presents TiM with an exciting opportunity to extend the reach of our programs and apply resources that further enhance our value to our customers,” said Zambuto. “Both organizations have a demonstrated commitment to customer satisfaction, innovation, technology, and ‘unparalleled excellence.’ These common cultural elements will lead to a significant upside for both organizations and especially for our customers.”

About Technology in Medicine

Since 1974, TiM has supplied hospitals, integrated healthcare systems, and alternate care delivery sites with the highest quality clinical engineering, asset management, and medical equipment maintenance and management services. Headquartered in Holliston, Massachusetts, TiM is committed to delivering high quality services at competitive prices and focusing on the development of strong, long-term relationships with its customers. The TiM team of highly proficient clinical engineers, biomedical equipment technicians, academicians, managers, and special consultants applies proven problem solving techniques to problems in medical equipment maintenance and management, environmental control, and facilities development. About Linc Facility Services

Headquartered in Houston, Texas, LFS is a business-to-business productivity partner and a leader in technology and high-value facility services. Since 1979, LFS has been delivering services to a diverse range of corporate, institutional, and government clients throughout the United States and around the world. Through a network of regional offices, LFS and its subsidiaries provide differentiated and innovative facility management solutions that drive quality, efficiency, and a reliable means to superior results. As a “partner in productivity” LFS’ goal is to deliver solutions that enable its clients — including airports, military installations, financial institutions, healthcare facilities, and manufacturing plants — to save valuable time and money and operate at their highest levels of performance. For more information about LFS and the services it offers visit www.lincofs.com.

About The Linc Group

Headquartered in Irvine, California, TLG is one of the nation’s most successful, single source providers of high value facilities management and building system services. In its quest to optimize the overall performance of customers’ facility infrastructure, the company offers premier on-site facility operations and management services, mobile HVAC preventative maintenance service programs, and bundled energy solutions and related renovation and retrofit projects. Structured from three established industry leaders — Linc Facility Services (LFS), Linc Network, and Linc Mechanical Services — TLG unites the companies through a unique business methodology and technology framework that blends innovation, technology, collaboration, and quality. Collectively, TLG companies service more than 16,000 facilities in 45 states and in select international markets through a professional workforce totaling more than 3,000 employees.
